

# ROAD RECLAIMER

A NEW CMP ATTACHMENTS EXCLUSIVE

## A RELIABLE, ECONOMICAL SOLUTION FOR SAFER ROADS

### ▪ RELIABLE

The Road Reclaimer is built from the toughest and most reliable materials available—including stress-free bolts, durable AR400 steel frame, a boom made of T1 steel, and a self-contained 1000 RPM PTO hydraulic system (45 GPM, 3,000 PSI) that draws 80 PTO HP from the tractor.

### ▪ ECONOMICAL

When presented with the choice of purchasing massive amounts of additional gravel vs. perhaps hiring an additional employee, we think the answer is a no-brainer. The Road Reclaimer enables existing gravel to be re-purposed, which frees up resources to be used more effectively.

### ▪ SAFER

Safe roads require gravel on the shoulder to be level with the asphalt. The Road Reclaimer is an innovative attachment which makes this endeavor much easier and faster than the traditional method of buying and hauling tons of new gravel to maintain the roadside.

**CMP Attachments, LLC.**

# ROAD RECLAIMER FEATURES

## STRESS-PROOF BOLTS

- Able to withstand long-term flexing and fatigue
- Much more reliable than competitors' pinning

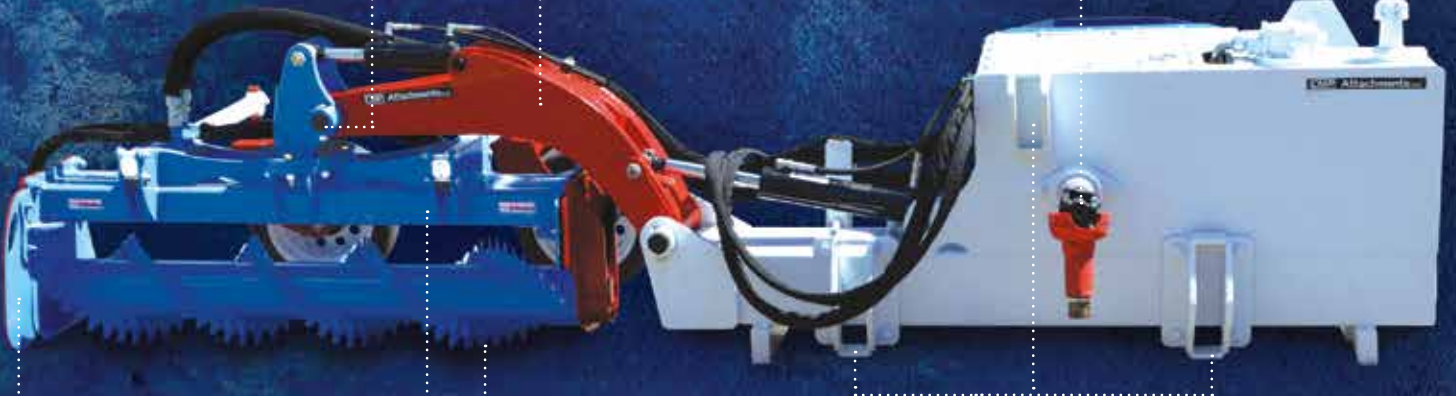

## BOOM MADE FROM T1 STEEL

Three times stronger than standard steel

## 1000 RPM PTO HYDRAULIC SYSTEM

- 45 GPM, 3,000 PSI
- Draws 80 HP from tractor

**NEW!**

## DURABLE AR400 STEEL

Hardened steel strength resulting in greater wear-life of sides

## REPLACEABLE CARBIDE TIPS ON AUGER DRUM

## BOOM FOLDS UP

8 Ft. wide (See inset below)

## CATEGORY 2 TRACTOR HITCH

## ROAD RECLAIMER

Weight:	2800 lbs.
Drum Width:	60"
Teeth:	Replaceable Carbide
PTO:	1000
3-Point:	Cat 2 or 3
Hydraulics Produce:	45 GPM
Pressure:	3000 PSI
