WHAT IS A “CLO” & WHAT DOES IT MEAN?

“Clo” is a measurement of the thermal comfort of a suit or device. One Clo represents the thermal comfort of an average person in business clothing in a room temperature indoor environment. Fractions of this thermal comfort are what are perceived when worn in the water. Each of the values are below 1.0 because water transfers heat out of the body 25 times faster than air. Wearing a Mustang Survival suit will increase cold water survival time exponentially.

HYPOTHERMIA PROTECTION

In just 20 minutes, cold water can deprive you of all mental and physical capacities, leading to hypothermia, unconsciousness and even death. Our team of engineers have done extensive research to understand cold-water survival. How long a person can survive in cold water primarily depends on the water’s temperature, exposure time, and the thermal insulation of the victim’s protective clothing.

SURVIVAL TIMES

This graph indicates random samples of Clo values and the corresponding estimation of survival time in calm water (assuming a thin person with a 5.5°F [3°C] drop in core temperature).

GETTING SEEN IN A RESCUE – WHAT COLOR IS BEST?

Prior to a recent study conducted by Mustang Survival, there was no research on the science of non-reflective conspicuity and the effects of color on conspicuity conducted in marine environments. The most recent Canadian standards prescribe Pantone colors (Orange, Red, and Yellow) for Personal Flotation Devices (PFDs) and Immersion Suits. Notably missing was high visibility American National Standards Institute (ANSI) approved colors which have been mandated on construction sites and within the Public Safety Community throughout North America.

THE FINDINGS

• Research findings show fluorescent yellow-green (G) followed by fluorescent orange (O) were the most conspicuous colors for a floating target. This result was found from simulated laboratory viewings and actual on-water experiments using human subjects.

• When viewing the colors against a simulated maritime horizon using their central vision, the test subjects judged fluorescent yellow-green and fluorescent orange, to be the more conspicuous colors compared to red, orange and yellow.

• On water testing of the four specific fabric colors showed that for both approaching and leaving a target in low or high intensity light, fluorescent yellow-green was the most conspicuous color overall, followed by fluorescent orange.

SINCE THESE FINDINGS, MUSTANG SURVIVAL HAS CHOSEN ANSI APPROVED FLUORESCENT YELLOW-GREEN AS THE STANDARD COLOR FOR USE IN PRODUCTS WHERE VISIBILITY IS A CONSIDERATION.
Neoprene Immersion Suit Child with Harness & Buddy Line

<tbody>
<tr>
<td><strong>3D CHASSIS</strong></td>
<td>Exclusive to the Elite™ Inflatable PFD. Creates a slim profile to enhance mobility, fit securely and reduce neck fatigue. Wind-tunnel tested to improve the body’s aerodynamics, reduce drag at speed and limit wind interference. Includes a breathable mesh back panel.</td>
</tr>
<tr>
<td><strong>CLOSED COMFORT SYSTEM™</strong></td>
<td>Adjustable neck seal that can be worn loose when out of the water and tightened for immersion. Designed to optimize comfort in constant wear situations.</td>
</tr>
<tr>
<td><strong>COMFORT COLLAR™</strong></td>
<td>Made of exclusive Mustang Survival materials to improve comfort around the neck, reduce chafing and encourage all-day wear.</td>
</tr>
<tr>
<td><strong>COMFORT CUFF™</strong></td>
<td>Made of exclusive Mustang Survival materials to improve comfort around the wrists, reduce chafing and encourage all-day wear.</td>
</tr>
<tr>
<td><strong>HYDROSTATIC INFLATOR TECHNOLOGY (HIT™)</strong></td>
<td>Water-pressure activated inflation. The inflator will automatically inflate under water pressure and not inadvertently in rain, spray or humidity. Inflates only when submerged in 4 or more inches of water.</td>
</tr>
<tr>
<td><strong>M-TECH™ COMFORT SYSTEM™</strong></td>
<td>A 3-layer, waterproof, breathable, wearable flotation system that keeps you dry, floats you when you need it and is so comfortable you’ll want to wear it even when you’re not on the water. The first layer is a waterproof, breathable outer shell, the second layer is segmented foam that flexes and moves with you and allows moisture to transfer away from the body and the third layer is a wicking liner that aids breathability. Included in the Catalyst Flotation Coats, Jackets and pants.</td>
</tr>
<tr>
<td><strong>MEMBRANE INFLATABLE TECHNOLOGY™ (M.I.T.)</strong></td>
<td>An ultra-lightweight inflation cell fabric that reduces product weight to create a lighter and more flexible fit.</td>
</tr>
<tr>
<td><strong>MOBILITY BASED SIZING™</strong></td>
<td>A sizing and fitting platform exclusive to the Sentinel™ Series Dry Suits. Based on more than two years of extensive anthropometric research, range of motion testing and user evaluations, Mobility Based Sizing™ offers users a semi-custom suit that reduces bulk and increases range of motion without the expensive custom price tags or long lead times. Applies to all Mustang Survival dry suits beginning with MDS6--.</td>
</tr>
<tr>
<td><strong>RAPID REPAIR TECHNOLOGY™</strong></td>
<td>Enables users to self-replace neck and wrist seals in an hour or less, and repair minor leaks in the dry suit shell.</td>
</tr>
<tr>
<td><strong>SECUREZIP™</strong></td>
<td>A self-healing zipper originally designed for military aviators. Creates a lighter weight, lower profile and more secure fit. Breaks out effortlessly upon inflation and heals itself upon repacking.</td>
</tr>
<tr>
<td><strong>TUG-TITE™</strong></td>
<td>Adjusters designed to be easy to use with cold or gloved hands to improve fit and reduce water flushing.</td>
