

**ICE COMMANDER® RESCUE SUIT (IC9002 02)**

For more than 10 years, the Ice Commander® has set the standard in Personal Protective Equipment (PPE) for cold water rescue. The IC9002 02 accommodates a wider range of body types compared to other existing ice rescue suits while offering unmatched adjustment to suit the needs of individual rescuers.

The IC9002 02 is a modular suit made of a durable urethane-coated nylon shell and a removable buoyancy liner that also provides thermal protection. Along with the integrated boots and gloves, the extended torso and covered diagonal entry zipper allow for quick donning while creating additional flexibility for the rescuer. Multi-point adjustment straps on the wrist, torso and legs and an adjustment zipper on the back of the hood create a near custom fit. A neoprene face guard offers additional protection from icy water and can be folded out of the way when not in use. The face guard can also be pulled to purge off excess air trapped inside the suit. The suits are reinforced in high abrasion areas and are 45% lighter than neoprene suits.

Water-tight hood designed with back zipper adjustment for secure fit, with SOLAS reflective tape and Velcro patch for light attachment

Neoprene face guard

FastTab™ for easy attachment of accessories like a knife or strobe light

Covered and watertight heavy duty diagonal entry zipper improves rescuer mobility, comfort and prevents water intrusion at the face opening

Detachable inner buoyancy liner constructed of closed-cell AirSoft™ foam for maximum flotation and thermal insulation. Liner can be unsnapped and removed for cleaning and repairs

SOLAS reflective tape and Velcro® patch for light attachment

Integrated self-adjusting safety harness

Pockets easily secured with Velcro®

Ergonomic ice awl pockets - sleeve pockets designed to attach and stow ice awls

Seat and elbows are reinforced with shell fabric

Welded nylon outer shell provides waterproofing and durability, and makes cleaning and repairs easier

Adjustment straps on torso, legs and wrist for improved fit and increased range of motion

Reinforced knees - reinforced and padded with 2.5 mm neoprene

SIZE	Universal Adult Weight: 110–330 lbs (50–150 kg) Height: 4'11"–6'7" (1.5m–2m)
NOTE	The Ice Commander is intended for ice and still/static cold water rescues only by trained professionals with the required and approved operating standards and requirements of their state or county.
