

Flame Resistant Foul Weather Coat MC1504 FR

Bib Overall MP4212 FR

The Mustang Survival Flame Resistant MC1504 FR Foul Weather Coat and MP4212 FR Bib Overall were developed for flight line personnel and the duties they perform, often in extreme environments. The key elements include the flame resistant (FR) qualities and the incorporation of a number of features that extend the garment's life span.

The outer shells of both garments are built with flame resistant, neoprene-backed NOMEX® fabric to meet the hazards of flight line duties. Both garments are lined with AirSoft™ foam (see the reverse for features). The Mustang MC1504 FR has leather abrasion patches on each shoulder for increased durability, and the bib overall has reinforced abrasion patches on the knee. The Mustang MC1504 FR Foul Weather Coat and MP4212 FR Bib Overall are lightweight and generously cut for easy movement when performing flight line duties.

The coat has two large cargo pockets on the front and one inside pocket, all with Velcro™ closures. The pockets employ grommets for drainage. A sturdy main zipper runs vertically down the chest for easy entry and donning. This zipper is covered from top to bottom with a full-length storm flap that contributes to the coat's enhanced foul weather protection. This cover also protects aircraft canopies and finishes from scratches.

The high-fitting bib overall has broad, adjustable elasticized suspenders. Gusseted lower leg zippers allow for donning/doffing while wearing heavy footwear. There are two waist pockets with drainage mesh.

Included in the purchase of the coat is customized silk-screening identifying the user's wing, squadron, ship's name, hull number, station, or department.

Mustang has a long history of working closely with the military to develop survival apparel solutions that offer enhanced performance and improved comfort. The coat and bib overall are compatible with equipment currently used by military flight line personnel, and meets their needs in all missions.

Flame Resistant Foul Weather Coat MC1504 FR

Bib Overall MP4212 FR

Flame Resistance

The flame resistant (FR) anti-static NOMEX® IIIA outer shells make it ideally suited for flight line personnel working around aircraft where fire and radiant heat hazards pose a threat.

Materials

The outer shell is constructed of 6 oz./yd2 NOMEX® IIIA, a fiber blend that provides superior protection against fire and has permanent anti-static properties.

AirSoft™ Foam Comfort

Engineered to enhance flotation and hypothermia protection, this coat and bib overall system are lined with ultra-soft closed cell foam that provides the ultimate in everyday wearability.

Colors

The color of both garments is Navy blue.

Weight

The dry weight of the coat is approximately 4 lbs (1.8 kg), size dependant. The dry weight of the bib overall is approximately 3 lbs (1.4 kg), size dependant.

Testing

All garments are tested to ensure the highest level of reliability and performance. Mustang Survival offers superior quality under rigid ISO-9001 standards.

Mustang Survival is an ISO 9001 Certified Company.

Mustang Survival has a policy of continuous improvement and reserves the right to modify products or features at any time.

NOMEX® IIIA is a registered trademark of DuPont. Velcro™ is a trademark of American Velcro™ Inc. AirSoft™ is a trademark of Mustang Survival Corp.
