

DRY PROTECTIVE LAYER (DPL) (MSD406)

The Dry Protective Layer (DPL) (MSD406) is a waterproof and breathable constant wear mid-layer that provides environmental protection while on operational missions in extreme weather or when there is risk of experiencing wind, rain, snow, or immersion. Weighing only 24 ounces, the DPL provides a wider scope of mission application with increased protection, improved mobility, and less bulk than other current solutions providing the same level of protection. Developed with input from military aviation users, the MSD406 is an excellent option for covert operations allowing the user to wear their choice of outer garments they need to blend in, while having the protection of modern technical apparel.

Exclusive to Mustang Survival, the Dry Protective Layer (MSD406) features:

- Mobility Based Sizing™ – offers users a semi-custom size fit that reduces bulk and increases mobility without the custom price tag
- Rapid Repair Technology™ – enables users to field replace neck and wrist seals and repair small leaks in an hour or less

Integrated stretch panels across back for added mobility and comfort

Waterproof breathable military grade BD6.5 GORE-TEX®

Mobility Based Sizing™ – Reduces bulk and increases range of motion. 24 individual sizes are available.

Low profile, lightweight and corrosion resistant TIZIP® waterproof front entry and relief and zippers are easier to operate and require less maintenance than traditional dry zippers

Rapid Repair patented adjustable neck seal allows the user to easily vent the suit reducing the thermal burden, but quickly close the neck seal with one hand to make it watertight. Neoprene and latex neck seals optional.

Two-point attachment removable suspender system for improved fit, mobility and comfort

Athletic fit that can be worn comfortably under a uniform or civilian clothing

Rapid Repair latex wrist seals standard, with neoprene optional

Integrated stretch panels in elbow and knees for added mobility and comfort

MOBILITY BASED SIZING™

EXCLUSIVE INNOVATIVE DRY SUIT DESIGN THAT REDUCES BULK WHILE INCREASING FIT, COMFORT & MOBILITY

Based on more than two years of extensive anthropometric research, range of motion testing and user evaluations, we introduce the industry's newest improved fitting platform designed specifically for dry suit users for tactical, rescue or special operations.

Mobility Based Sizing™ offers users a semi-custom suit that reduces bulk and increases range of motion without the expensive custom price tags or long lead times.

The Mobility Based Sizing platform:

- Was developed based on anthropometric data from 2,500 North American 3-D body scans, ensuring the sizing and patterns of the suits fit the greatest number of individuals
- Immensely improves range of motion while decreasing bulk
- Offers standard expanded sizing (such as short and tall) for all sizes so users can order a semi-custom suit without the expensive price or long lead times

The Mobility Based Sizing platform is like none other currently in the industry. To order a suit that fits you best, follow our detailed measuring instructions online at:
