

THERMAL BASE LAYERS

Designed as part of a full thermal management system, these two new base layer options have been constructed for optimal compatibility with Mustang Survival dry suits. Available in both a midweight and lightweight version, each solution will be offered as a two piece set made of the highest quality Polartec® materials to provide utmost flexibility based on mission profile. Top and bottom sold separately.

Thermal Base Layer Midweight Top (MSL602)

Thermal Base Layer Midweight Bottom (MSL603)

SIZE	Mobility Based Sizing™ (regular sizes only) – visit www.mustangsurvival.com/mobility
COLORS	■ Black
CLO	Immersed Clo 0.45 when worn with a Sentinel Series Mustang Survival Dry Suit Immersed Clo 1.12 when worn with a Sentinel Series Mustang Survival Dry Suit and Dry Suit Fleece Thermal Layer (MSL600/MSL601)

Made from a combination of Polartec® Power Grid™ and water repellent Polartec® Wind Pro®

Water repellent Polartec® Wind Pro® panels prevent wicking and water pick up on wrist, neck, and crotch

Designed to be worn with Mustang Survival dry suits and the MSL600 fleece thermal layer

Thumb holes ease dry suit donning

Boxer brief style compatible with front dry suit relief zipper

Mobility Based Sizing™ offers a large range of semi-custom sizes that optimize fit, comfort, and functionality without the expensive custom price tag and long lead times.

Midweight thermal insulation

Sleeve pocket for small storage

Low profile flat lock seam construction

THERMAL BASE LAYER TOQUE MSL606

SIZE	One size fits all
COLORS	■ Black

- Made from water repellent Polartec® Wind Pro®
- Next-to-skin fit allows toque to be worn alone or under a helmet
- Midweight thermal insulation
- Low profile flat lock seam construction
